

## **FINNCONT INCREASES ITS PLASTIC PRODUCTION CAPACITY**

The beginning of March saw the completion of the extension to Finncont Oy's plastic plant, adding almost 4,000 square metres of production space, thanks to which the company can double its plastic production capacity. The new plant was designed with special attention to material flows, resulting in increased cost-efficiency.

The total area of the plastic plant is now 9,000 square metres. The entire plant is equipped with a sprinkler system to ensure uninterrupted production and to protect the clients' moulds.

Finncont Oy, established in 1974, is one of Europe's leading manufacturers of IBC containers as well as the leading contract manufacturer of rotationally moulded plastic products in the Nordic region. Finncont's expected turnover for 2006 is 16.2 million euros, and the company employs 125 people.
